

2020-2021 Impact

It goes without saying that our fiscal year 2020 to 2021 was unlike any other in our 35 year history. Although the COVID-19 pandemic limited our ability to engage volunteers throughout the year, our community of financial supporters came together to uplift us. With the additional support from our donors, we were able to make up for our lack of volunteers by hiring professionals in their place.

Our Board continued to meet and provide leadership to the rest of the Alachua Habitat for Humanity team, who continued working diligently with new safety protocols in place. New homeowners and their families did not flinch from their sweat equity commitment and fully embraced our programs.

During a time of unprecedented challenges, it was reassuring to know that our Florida Green Building Certified homes serve as a healthy, happy dwelling for our families to shelter in place.

2020-2021 Impact

As volunteering resumes for 2021 and 2022, we look forward to reengaging our volunteers and the rest of our community. We will continue involving more people in our mission and serving more families throughout Alachua County and North Central Florida.

Alachua Habitat for Humanity thanks you for your support as we work towards empowering more people to gain strength, stability and self-reliance through shelter.

Scott Winzeler
Chief Outreach and Development Officer

Donate today to help Alachua Habitat continue building! You can donate online at alachuahabitat.org or email swinzeler@alachuahabitat.org to sponsor a build.
